Subject: Re: Monthly Safety: Summer Time Hot Cars

For Widest Dissemination:

hot cars aren't cool!

how long does it take for a car to get hot?

vehicle temperature

outside F°	inside F°	
	10 mins	30 mins
70°	89°	104°
75°	94°	109°
80°	99°	114°
85°	104°	119°
90°	109°	124°
95°	114°	129°

Even in the shade, the temperature in the car can still soar quickly to *dangerous levels.*

Leaving the windows open has *little effect* on how hot it gets inside the car.

No living person or animal should ever be left in a parked car!

For CAP:
Larry Mattiello, Lt Col, CAP
NYWG Ass't SE
NY001
